

Course information for  
**Microbial Biotechnology**

[Syllabus-MB455-555.pdf](#)

<b>Course #</b>	<b>MB 455/555</b>	
<b>Semester</b>	Spring 2026	
<b>Instructor</b>	José Manuel Bruno-Bárcena 4554 Thomas Hall North Carolina State University Raleigh, NC 27695	Phone : 919-513-1495 Fax : 919-515-7867 Email : <a href="mailto:jbbarcen@ncsu.edu">jbbarcen@ncsu.edu</a> Web Site : <a href="https://cals.ncsu.edu/plant-and-microbial-biology/people/jbbarcen/">https://cals.ncsu.edu/plant-and-microbial-biology/people/jbbarcen/</a>
	Areej Alharbi, MS 4554 Thomas Hall Addition North Carolina State University Raleigh, NC 27695	Phone: 919-513-3834 Fax: 919-515-7867 email: <a href="mailto:ahalhar2@ncsu.edu">ahalhar2@ncsu.edu</a>
	Guest instructors will also present lectures	
<b>Requisite</b>	Prerequisite: MB 351 and GN 311	
<b>Credit Hours</b>	3	
<b>Restrictions</b>		
<b>GEP Status</b>	None	
<b>Location</b>	03214 Gardner Hall	
<b>Date</b>	January 13 <sup>th</sup> - April 28 <sup>th</sup>	
<b>Class Hours</b>	Lecture - Tuesdays, 8:30 AM - 11:15 AM	
<b>Office Hours</b>	Tuesday, 12:50-14:30	
<b>Course Website</b>	<a href="https://wolfware.ncsu.edu">https://wolfware.ncsu.edu</a>	
<b>Delivery Format</b>	This is a full semester class. Students are required to attend weekly lectures during the weeks the course is taught. Be sure to pay attention to any updates to the course schedule as the information in this syllabus may have changed. Please discuss any questions you have with the instructor.	
<b>Course Description</b>	This is an advanced undergraduate/ beginning graduate level overview of selected topics in microbial biotechnology. This course covers how microbes are used to manufacture components of food and consumer products; biologics and biomaterials using recombinant DNA and is organized following the steps in discovery and development of biologics. An introduction to microbial growth kinetics is included as well as discussions on generating products from genetically modified microorganisms (GMOs, and how the U.S. Food and Drug Administration (FDA) regulate these products. A minor portion of this class will also present schemes for choosing microbial hosts & vector expression systems to produce heterologous peptides, proteins, or post translational-modified proteins and how this affects overall process strategy. Methods for production of industrial enzymes and selected applications of enzyme technology; for the pharmaceutical, chemical industries and for environmental remediation are presented.	
<b>Technology Requirements</b>	To complete the course, all students will be required to have access to an active internet connection. If you do not have Adobe Acrobat Reader installed on your computer, you will need to go to the following web site and follow the instructions to download a free version: <a href="http://www.adobe.com/products/acrobat/readstep2.html">http://www.adobe.com/products/acrobat/readstep2.html</a>	
<b>Course Structure</b>	This lecture course will cover theory of Microbial Biotechnology. One week after the completion of each lecture students will be required to submit written reports (1 page minimum) describing the objectives of the lecture, concepts covered and notes covering the	

	<p>discussions in the lecture. During the semester students will be regularly tested on their understanding of the material presented to them in the form of quizzes or by submitting the collected lecture notes (textbook reading assignments and additional reading assignments provided by instructor). At the end of the course students will complete a final exam that will cover all the topics discussed during the course.</p> <p>Students taking MB 555 will have the additional requirement of a major term paper. The subject of this final paper will be to search and select from Science (<a href="http://www.sciencemag.org/">http://www.sciencemag.org/</a>) or Nature (<a href="http://www.nature.com/">http://www.nature.com/</a>) an experimental upstream approach for producing one active pharmaceutical ingredient (API) using microbes (GMO or non-GMO). The paper should be written following the ASM journal instruction (<a href="http://jb.asm.org/misc/ifora.shtml">http://jb.asm.org/misc/ifora.shtml</a>) for authors. It should contain at least five written pages, font 12, double-spaced. The reference pages will not be counted as the written pages. The graduate students will be graded as described below.</p>
<b>Text Requirements</b>	<p>There is no single advanced undergraduate and graduate level text for all the topics covered in this course. However, reading sections from several books are highly recommended for this class. The following books may be available on reserve in the D. H. Hill library</p> <ul style="list-style-type: none"> <li>• <i>Basic Biotechnology</i>, Third Edition 2006. Colin Ratledge, Bjørn Kristiansen Editors. ISBN 0521840317, Cambridge University Press.</li> <li>• <i>Demain AL, Davies JE, editors in chief 1999. Manual of Industrial Microbiology and Biotechnology. ASM Press Washington, D.C. second edition.</i></li> <li>• <i>Microbial Biotechnology</i>, Second Edition, 2007. Alexander N. Glazer, Hiroshi Nikaido. ISBN 9780521842105, Cambridge University Press.</li> </ul> <p>This reference will also be available in the Reserve Room of the D. H. Hill Library.</p>
<b>Learning Outcomes</b>	<p>At the end of this course, students will:</p> <ul style="list-style-type: none"> <li>• Describe “omics” and metabolic pathway engineering approaches to engineer microbes for the over-production of metabolic intermediates and to generate novel compounds.</li> <li>• Explain the importance of patents for commercial development of a microbial bioprocess; the impact of GMO versus non-GMO organism in processes, the pathway of biologics development and how the U.S. Food and Drug Administration (FDA) regulate the steps of development of a human therapeutic.</li> <li>• Explain how microbial enzymes and genetically engineered microbes are used in industrial biocatalysts.</li> <li>• Explain the advantages and disadvantages of production of peptides, proteins, glycoproteins, in Gram negative, Gram positive, yeast expression systems.</li> <li>• Mathematically describe microbial growth and product formation in batch, fed-batch, continuous culture, and immobilized cells. Explain how each of these methods is used in microbial biotechnology, environmental remediation etc....</li> </ul>
<b>Lecture Outlines by Topical Areas</b>	<p><b>Week 1</b> - January 13<sup>th</sup> Course introduction, scope, and concepts to be presented this semester. <b>Safety in Biotechnology. Emerging Infectious Diseases, Public Health</b></p> <p><b>Week 2</b> - January 20<sup>th</sup> Genetics and Patenting. What are patents, and how do they work? Why patent? What are some of the potential arguments in favor of gene patenting? What are some of the potential arguments against gene patenting? What laws govern gene patenting? How does genome information place in the public domain work? Who can use it? <b>Invited Speaker:</b> Dr. Logan Buck - Womble Carlyle Sandridge &amp; Rice, LLP</p> <p><b>Week 3</b> - January 27<sup>th</sup> Metagenomics in Biotechnology: understanding and exploiting microbial diversity. <b>Invited Speaker:</b> Dr. Andrea Azcarate-Peril - Director Microbiome facility UNC</p> <p><b>Week 4</b> - February 3<sup>rd</sup> Culture Collections and Gene Banks. Microbial resources. Establishment of culture collections. Taxonomic Terminology. How are the strains preserved? Patent</p>

depository. Seed lot and cell bank system.

**Week 5** - February 10th

Microbial growth kinetics: batch cultures, continuous cultures, and fed-batch culture. Biofilms immobilized enzymes and immobilized cells as biocatalysts.

**Week 6** - February 17<sup>th</sup>

Wellness Day (No classes) I will add some material for voluntary review during the rest of the week

**Week 7** - February 24<sup>th</sup>

Bioterrorism/bioweapons-related policymaking and Opportunities

**Week 8** - March 3<sup>rd</sup>

Overview of protein expression strategies – choosing a heterologous host. Protein folding and inclusion bodies – the problem of protein refolding. Protein expression in *E. coli* and other Gram-negative hosts.

**Week 9** - March 10<sup>th</sup>

**Midterm Exam. Graduate Student Final Paper Due**

**March 16th – 20th**

**Mon - Fri**

**Spring Break - No Classes**

**Week 10** - March 24th

Microbial monitoring during bacterial vaccine manufacturing processes and rapid microbial identification in a pharmaceutical Quality Control (QC) microbiology laboratory.

**Invited Speaker:** Dr. Matthew R. Evans.

**Week 11** - March 31<sup>st</sup>

Industrial enzymes for biopolymer degradation: starch, pectin, and biomass applications. Industrial biocatalysis: sweetener, detergent, textile, and lipid hydrolysis applications.

**Invited Speaker:** Alan House Ph.D. Franklinton Novozymes North America.

**Week 12** - April 7<sup>th</sup>

Thermo-bacteriology: Thermal microbial destruction kinetic. Decimal reduction time.

**Week 13** - April 14<sup>th</sup>

A case study of Agrochemical Biodegradation and The Soil Microbiome

**Week 14** - April 21<sup>st</sup>

Pathways of microbial biotech product development, compliance, and regulation.

**Week 15** - April 28<sup>th</sup> **Last Day of Classes Final Exam to be determined (8:30-11:00 am)**

**Course Grading**

Class Assignments and Point Value	MB 455	MB 555
Class participation & Class notes	60 points	60 points
Quizzes	30 points	30 points
Midterm Examinations (1)	40 points	50 points
Final examination	40 points	50 points
Final paper	<u>0 points</u>	<u>60 points</u>
	170 points	250 points

Ask questions during class. Class attendance and participation will help you understand the material being presented and will be considered in your final grade.

Students are not allowed to take this course for "credit only". In order to receive recognition for an audit, graduate students are required to complete all assignments and earn a grade of C- or better. Conversion from letter grading to audit grading is subject to university deadlines. Refer to the Registration and Records calendar for deadlines related to grading.

For more details, refer to

<b>Health and Well-Being Resources</b>	<p>These are difficult times, and academic and personal stress is a natural result. Everyone is encouraged to take care of themselves and their peers. If you need additional support, there are many resources on campus to help you:</p> <ul style="list-style-type: none"> <li>● Counseling Center (<a href="https://counseling.dasa.ncsu.edu/">https://counseling.dasa.ncsu.edu/</a>)</li> <li>● Health Center (<a href="https://healthypack.dasa.ncsu.edu/">https://healthypack.dasa.ncsu.edu/</a>)</li> <li>● If the personal behavior of a classmate concerns or worries you, either for the classmate’s well-being or yours, we encourage you to report this behavior to the NC State CARES team: (<a href="http://go.ncsu.edu/NCSUcares">go.ncsu.edu/NCSUcares</a>).</li> <li>● If you or someone you know are experiencing food, housing, or financial insecurity, please see the Pack Essentials Program (<a href="https://dasa.ncsu.edu/pack-essentials/">https://dasa.ncsu.edu/pack-essentials/</a>).</li> </ul>
<b>Students with Disability Policy</b>	<p>Reasonable accommodations will be made for students with verifiable disabilities. To take advantage of available accommodations, students must register with Disability Services for Students ( <a href="http://www.ncsu.edu/dso/">http://www.ncsu.edu/dso/</a> ) at 1900 Student Health Center, Campus Box 7509, 515-7653. For more information on NC State’s policy on working with students with disabilities, please see the Academic Accommodations for Students with Disabilities Regulation at: (<a href="http://www.ncsu.edu/policies/academic_affairs/courses_undergrad/REG02.20.1.php">http://www.ncsu.edu/policies/academic_affairs/courses_undergrad/REG02.20.1.php</a> )</p>
<b>Anti-Discrimination Statement</b>	<p>NC State University provides equality of opportunity in education and employment for all students and employees. Accordingly, NC State affirms its commitment to maintain a work environment for all employees and an academic environment for all students that is free from all forms of discrimination. Discrimination based on race, color, religion, creed, sex, national origin, age, disability, veteran status, or sexual orientation is a violation of state and federal law and/or NC State University policy and will not be tolerated. Harassment of any person (either in the form of quid pro quo or creation of a hostile environment) based on race, color, religion, creed, sex, national origin, age, disability, veteran status, or sexual orientation also is a violation of state and federal law and/or NC State University policy and will not be tolerated. Retaliation against any person who complains about discrimination is also prohibited. NC State’s policies and regulations covering discrimination, harassment, and retaliation may be accessed at <a href="http://www.ncsu.edu/policies/campus_environ">http://www.ncsu.edu/policies/campus_environ</a> or <a href="http://www.ncsu.edu/equal_op">http://www.ncsu.edu/equal_op</a>. Any person who feels that he or she has been the subject of prohibited discrimination, harassment, or retaliation should contact the Office for Equal Opportunity (OEO) at 515-3148.”</p>
<b>Other Important Resources</b>	<ul style="list-style-type: none"> <li>● <b>Keep Learning:</b> <a href="#">Keep Learning</a></li> <li>● <b>Protect the Pack FAQs:</b> <a href="#">Frequently Asked Questions   Protect the Pack</a></li> <li>● <b>NC State Protect the Pack Resources for Students:</b> <a href="#">Resources for Students   Protect the Pack</a></li> <li>● <b>Academic Success Center</b> (tutoring, drop in advising, career and wellness advising): <a href="#">Academic Success Center</a>.</li> <li>● <b>NC State Keep Learning, tips for students opting to take courses remotely:</b> <a href="#">Keep Learning Tips for Remote Learning</a></li> <li>● <b>Introduction to Zoom for students:</b> <a href="https://youtu.be/5LbPzzPbYEw">https://youtu.be/5LbPzzPbYEw</a></li> <li>● <b>Learning with Moodle, a student’s guide to using Moodle:</b> <a href="https://moodle-projects.wolfware.ncsu.edu/course/view.php?id=226">https://moodle-projects.wolfware.ncsu.edu/course/view.php?id=226</a></li> <li>● <b>NC State Libraries</b> <a href="#">Technology Lending Program</a></li> </ul>
<b>Emergency Preparedness</b>	<p>Emergency Preparedness: Familiarize yourself with the building(s) that you frequent. Know the layout, including exit locations, stairwells, and the Emergency Assembly Point (EAP). Review the “Quick Guide for Emergencies” that is found near the door in many classrooms for specific emergency information and instructions. If the quick guide is not available in your classroom or for additional information, visit <a href="http://wolfalert.ncsu.edu">wolfalert.ncsu.edu</a> or <a href="http://go.ncsu.edu/EMMC">go.ncsu.edu/EMMC</a>. To receive emergency notifications, make sure your information and cell phone number is updated in MyPack Portal.</p>

**To report an emergency:  
911 from a campus landline  
919-515-3000 from a cell phone while on campus**
